School District Integrated Pest Management Plan

When completed, this template meets the Healthy Schools Act requirement for an integrated pest management (IPM) plan.

An IPM plan is required if a school district uses pesticides¹

pecific information about monitoring and ins example: Sticky monitoring boards are placed in the kitch							
Sticky traps are set in areas affect	ed and monitored dai	ly prior to school start times.					

Pests and non-chemical management practices

This school district has identified the following pests and routinely uses the following non-chemical practices to prevent pests from reaching the action level:

Pest	Remove food	Fix leaks	Seal cracks	Install barriers	Physical removal	Traps	Manage irrigation	Other
Mice	2		Ø	V	4	7		
Spiders			✓		☑	4		
Ants				Ø	4	V		
Flies	V							

Chemical pest management practices

If non-chemical methods are ineffective, the school district will consider pesticides only after careful monitoring indicates that they are needed according to pre-established action levels and will use pesticides that pose the least possible hazard and are effective in a manner that minimizes risks to people, property and the environment.

This school district expects the following pesticides (pesticide products a list includes pesticides that will be applied by school district staff or licen
